

# RX-1500 Series

**MICRO SEIKI**

RX-1500 · RY-1500D

RX-1500VG · RY-1500DV

RX-1500FVG · RY-1500FV

**RX-1500 Series**

	RX-1500	RX-1500VG	RX-1500FVG
<b>Air Bearing System (Patent Pending)</b> This system floats a heavy platter 0.03 mm over the base. This provides ideal platter rotation without mechanical friction in the direction of thrust.	No	No	Yes
<b>Vacuum Suction System (Patent Pending)</b> A vacuum pump seals the record disc securely to the platter. This not only corrects for warps in the record disc but more importantly, ensures positive contact between record disc and platter. This contact reduces or mutes resonances and surface reflection in the system.	No	Yes	Yes
<b>Quadruplex Suspension System (Patent Pending)</b> This system consists of coil spring, rubber diaphragm supported piston, compressed air and high viscosity oil. These four components form an effective guard against vibration and microphonic feedback.	Yes	Yes	Yes
<b>Bronze Casting Platter (9 Kg)</b>	Aluminum 2.8 Kg	Yes	Yes
<b>Inertia moment (Kg.cm<sup>2</sup>)</b>	600	1360	1360
<b>RS-1500, Motor Unit Base</b>	No	Yes	Yes
<b>Air-pump Unit</b>	No	RP-1090	RP-1110
